Erstellen Sie eine Migration, die zwei Tabellenfelder hinzufügt.

Aktualisieren Sie den Tabelleninhalt.

Integrieren Sie die neuen Tabelleninhalte in die Webapp.

Orientieren Sie sich an folgenden Daten:

Hausaufgabe:
In addition to the existing fields, it makes sense that a project would also have a website URL (an external link to a different site) and the date when pledging ends. Use a migration to add the following fields (at a minimum) to the projects database table:

website   string
pledging_ends_on   date
Then use the console to update the existing projects in the database to have values for those fields. Finally, change the index page to display the new project fields.
